Experience

Software Engineer II – Cloud and .Net Specialist
Ecovadis

Barcelona, ES
July 2023 – Present

- Developing and maintaining a large-scale platform using C#,.NET Core, ASP.NET, SQL Server, Microsoft Azure.
- Architecting and deploying cloud native microservices, improving scalability and reducing downtime risks.
- Integrated centralized logging and monitoring with the ELK stack, reducing troubleshooting time by 30%.
- Collaborating cross-functionally in Agile/Scrum teams to deliver secure, efficient, and compliant solutions.

.Net Software Engineer I
Ecovadis

Tunis, TU
Nov 2021 – June 2023

- Led migration of a monolithic application to a microservices architecture, cutting release cycles from weeks to days.
- Optimized CI/CD pipelines with Azure DevOps, reducing build & deployment times by 40%.
- Actively participated in Agile ceremonies, coached junior developers, and introduced best practices in code quality.

Blockchain Consultant
Open2be

Remote
Feb 2021 – Oct 2021

- Designed and delivered decentralized applications (dApps) and ICO platforms using Solidity, Web3.js, Ethereum, BSC, and React.js.
- Developed smart contracts for tokenization and transactions with a strong focus on security and gas optimization.
- Advised stakeholders on the blockchain adoption strategy, ensuring business use cases aligned with technology capabilities.

Software Engineer Intern
Equalius

Tunis, TU
Jan 2021 – Oct 2021

- Built a regulatory monitoring application using Python, Node.js, Angular, Flask, MongoDB, and GCP.
- Designed and integrated Web Scrapers to automate data collection from legal and compliance sources.

Education

University of Tunis El Manar
Eng in Computer Science

Sept 2017 – Oct 2021

- **Coursework:** Computer Architecture, Comparison of Learning Algorithms, etc

Technologies

Languages: C#, JavaScript,Java,Python,C/C++,HTML/CSS, SQL

Technologies: .Net core,Asp.net,Spring, Flask, Node.Js, React, Angular,Android

Tools: Azure,Docker,K8S,Helm, Lens,ELK Stack, MongoDb,Sql Server, CosmoDb
